

Transmission Gearing for Portal Axles

Covers Parts #9843R

To maintain vehicle speed after installation of the portal kit, the transmission gear ratio should be adjusted as shown below:

Single Speed Transmission #9791

Installation of these gears is **optional**.

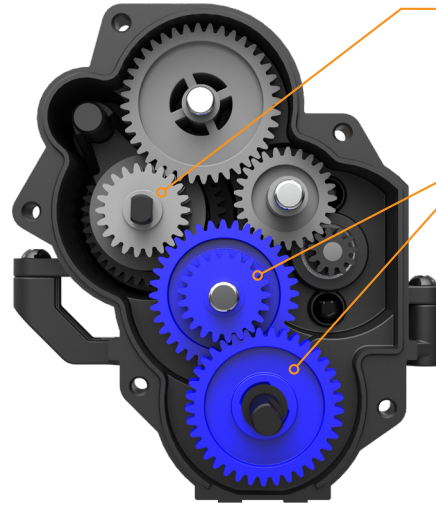

Red gears included (also available separately as #9776A).

Transmission gear ratio of 6.8:1.

Refer to the exploded views included with your model to aid in the disassembly/assembly process.

Two Speed Transmission #9891

Installation of these gears is **required**.

Light gray gear included with the two speed transmission #9891

Blue gears included (also available separately as #9776X).

Transmission gear ratio of 19.1:1 (low gear) and 5.8:1 (high gear)

Refer to the exploded views included in the #9891 kit to aid in the disassembly/assembly process.
